Manual of use

The machine can be operated in manual or automatic mode.

MANUAL MODE

The manual mode is simple. The machine can be operated by a single person. This mode allows filling according to the rhythm of the operator. After starting the machine, prepare the syrup at the correct storage temperature. The operator must calibrate the machine to obtain the standard filling time for the desired volume. The filling is done in an On - Off way by pressing on a pedal or by button on the control panel.

AUTOMATIC MODE

The automatic mode is selected on the screen board. The operator calibrates the machine to obtain the standard filling time for the desired volume. By choosing from the control panel menu the waiting time between each filling the filling operation is done automatically without the operator activating the pedal or the button on the control panel.

Maintenance and cleaning

- Should be done before and after each use
- Circulate hot water through the system for a few minutes
- **Do not use** soap or other cleaning products in the machine
