agrizone.ca

FEATURES

- Active ingredient: copper sulphate (20%).
- Inert ingredients: inorganic acids, inorganic salt and water (80%).

What is the PRO SABOT solution used for?

PRO SABOT is a simplified foot bath solution that controls and prevents the spread of infectious hoof diseases within the dairy herd.

ADVANTAGES

- **It's an all-in-one concentrated liquid** just add water to dilute the solution
- **Allows the passage of more cows** compared to a footbath made from copper sulphate powder only
- **Improves the hardness of hooves**
- **Promotes a longer activity** copper ions in the solution, **even in contact with organic matter (manure)**
- Facilitates to keep control of several infectious diseases of hoofs
- Very effective against pathogenic bacteria

DIRECTIONS OF USE

Use a solution of 8 to 10% of PRO SABOT and water (15 to 18 L of PRO SABOT in 170 L of water).
